

Integrated Approaches to Water Management: From Chesapeake Bay, USA to Xiamen, China

4 July (Monday) – 3pm to 5pm – Suntec Meeting Room 305 – Level 3

Please join the Singapore Water Association and the Maryland-Asia Environmental Partnership for a unique discussion as we provide holistic insights to address sustainable water solutions for both urban and rural water needs. Please join us to hear about cutting edge technologies and solutions including:

- The world's first sustainable aquaculture system
- The Arrow System™ leading edge 97% wastewater discharge recovery technology
- Emerging nutrient removal and biomass technologies
- Multifaceted custom dredging systems
- Satellite remote sensing applications for environmental monitoring and climate resiliency solutions
- Water data mapping systems for multi vendor access and holistic project data retrieval
- Food safety, waterborne disease, disaster response and risk management solutions
- Good governance leadership on the management of Chesapeake Bay

Speakers:

Tang Kin Fei, President of SWA, Sembcorp Group, President & CEO (invited)

Vance Hum, President and CEO, I.M. Systems Group

Peter Gourlay, President and Founder, MD-AEP

Matthew Tunnel, CEO, Formos

George Oyler, Founder, Clean Green Chesapeake

Tom Sprehe and George Perdikakis, Senior Vice Presidents, KCI Technologies

Farid Gozashti, Director, Everpure Hi-Tec Water Solutions PVT, LTD
