

The Value Proposition:

Testimonial from Washington Laboratories, Founding Partner of MD-AEP.

"The Maryland Asia Environmental Partnership provides critical linkages within and between policy, industry and the human element that are necessary to assess, address and redress environmental issues. The MDAEP reaches across boundaries, physically and virtually, to bring political, economic and technical resources together to engage in critical thinking and create partnerships for change in Asia. As a founding member, Washington Laboratories has been working with MDAEP since its inception. Our visibility and access have been auspiciously enhanced through our cooperation."

Mr. Michael Violette, President of Washington Laboratories and Founding Partner of the MD-AEP
